

Aerospace and Defense Declarable Substance

Thank you for your recent inquiry with respect to whether GRISWOLD™ Rubber products contain any of the substances on the current Aerospace and Defense Declarable Substance List (AD-DSL).

The following chemicals are present in GRISWOLD™ Rubber.

Chemical Name	CAS Number	Concentration by weight
Phenol, Syrenated	61788-44-1	<0.1%
Phenol	108-95-2	<0.1%
Thiram	137-26-8 (75%)	<0.1%

The materials listed above are bound within the polymer and therefore not in a respirable form presenting an inhalation hazard per AD-DSL. Therefore, no warning statement is required.

If further assistance is needed, please contact Customer Service at orders@griswoldproducts.com.

In order for Griswold Products LLC to be able to provide accurate information to our customers we are relying on our suppliers to verify if the "substances" and "preparations" that they provide contain AD-DSL listed substances as noted in the Material Safety Data Sheet/Safety Data Sheet (MSDS/SDS) of the materials used to produce our products. The determination of both the presence of a substance and level is based on calculation and not the result of any actual testing. Griswold Products LLC makes no representation that it has verified the accuracy of the MSDS/SDS information or for incomplete or inaccurate information contained in this statement.
